KAREEM-ELDEEN AHMED

Software Engineer

kareemeldeenahmed@gmail.com | +201025803904 | Portfolio

SUMMARY

Results-driven Software Engineer with extensive experience designing and deploying scalable web applications, desktop solutions, and enterprise ERP systems. Proficient across full-stack development and database architecture, leveraging Java, JavaFX, Python, ReactJS, and relational databases (MySQL, PostgreSQL). Proven track record in developing high-performance SaaS platforms, implementing AI-enhanced Odoo ERP solutions, and managing Linux server environments. Strong technical leader and communicator adept at cross-functional team management, stakeholder collaboration, and mentoring developers across all skill levels

KEY SKILLS

- Languages & Frameworks: Java, Python, JavaScript, ReactJS, NextJS, JavaFX, HTML5, CSS3, Tailwind CSS, Bootstrap, Spring Boot
- Enterprise & Databases: Odoo ERP (Implementation & Development), MySQL, PostgreSQL, Linux
- Core Competencies: Team Leadership, Agile Collaboration, Design Patterns, Software Architecture, English (Proficient)

WORK EXPERIENCE

Freelance Software Engineer | Self-Employed **June 2024 – Present**

- Developed and deployed responsive websites, desktop software, and custom cashier/POS applications using Java, JavaFX, JavaScript, and MySQL.
- Architected normalized relational database schemas in MySQL to ensure secure data persistence and optimal transaction processing.
- Built modern, mobile-first user interfaces leveraging HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Collaborated directly with business clients to gather system requirements, design custom workflows, and deliver maintainable, client-ready software solutions.

Coding Instructor | iSchool **July 2025 – December 2025**

- Delivered hands-on curricula covering Python programming, Front-End web development, and fundamental Artificial Intelligence (AI) concepts.
- Mentored diverse student cohorts through structured coding projects, debugging exercises, and practical software design.
- Evaluated technical assignments, conducted live code reviews, and adapted instructional pacing to ensure core concept mastery.

Coding Instructor | RoboMind **June 2024 – July 2025**

- Instructed students in Front-End development (HTML, CSS, JavaScript), Python, and introductory AI/Machine Learning principles.
- Designed practical coding challenges and guided learners through building interactive applications from scratch.
- Fostered computational thinking, problem-solving skills, and algorithmic fundamentals across varied age groups

Freelance Coding Instructor | Self-Employed **January 2023 – December 2025**

- Provided customized, one-on-one and group instructional sessions in software engineering, programming logic, and web technologies.
- Simplified complex computational and architectural concepts for learners across multiple skill levels and age demographics.
- Guided aspiring developers through building end-to-end portfolio projects and preparing for technical assessments

PROJECTS

Restaurant ERP & Automation Platform (Demo) | Odoo, Python, AI Integration

- Implemented an enterprise ERP system managing core business domains including inventory tracking, employee lifecycle, client records, and scheduled events.
- Integrated an AI-powered chatbot to handle customer interactions and automated inquiries alongside an internal real-time team chat.
- Configured and deployed a connected e-commerce web platform to streamline digital ordering and unify sales pipeline data

KareemEldeen POS & Cashier System (SaaS Solution) | Java, JavaFX, MySQL, CSS

- Architected and deployed a multi-client desktop point-of-sale (POS) and cashier management software solution configured for individual client hardware environments.
- Built a modern, intuitive desktop interface using JavaFX and custom CSS styling for rapid, error-free order entry and checkout operations.
- Engineered a normalized MySQL database schema with transactional consistency to track real-time inventory, sales logs, and receipt generation

TOC (Technical Office Company) Web Platform | JavaScript, Tailwind CSS, HTML5, Animation Libraries **(Website Link)**

- Built a responsive corporate web platform showcasing company services, project portfolios, partner directories, and company credentials.
- Developed an interactive consultation booking workflow and dynamic contact forms with automated client inquiry routing.
- Optimized user experience and performance using Tailwind CSS and lightweight animation libraries, ensuring fast loading speeds across all device viewports

EDUCATION

Bachelor of Electronic Engineering **Sep 2020 – Sep 2025**

Faculty of Electronic Engineering, Menoufia University

- Computer Science and Engineering Department
